Reactor Operations, Facilities Support (Craft)

Statement of Significance

Date of Construction 1962 Architect/Engineer/Builder General Electric

- ☒ In the opinion of the surveyor, this property appears to meet the criteria of the National Register of Historic Places.
- ☒ In the opinion of the surveyor, this property is located in a potential historic district (National and/or local).

The 1722-N Building was constructed in 1962. Mechanical/welding functions related to the repair of radioactive parts and equipment were conducted. Today, mechanical and welding equipment is stored in the facility. This property is not associated with an important person (Criterion B), does not possess any distinctive architectural features or methods of construction (Criterion C), and does not qualify under Criterion D as the principal source of important information. However, the 1722-N Building qualifies under Criterion A due to its association with the Cold War production of plutonium at N Reactor, and its contribution to Reactor Operations, specifically the Facilities Support. Therefore, it is the conclusion of the U.S. Department of Energy that the 1722-N Building is eligible under Criterion A for inclusion on the National Register of Historic Places as a contributing property within the Hanford Site Manhattan Project and Cold War Era Historic District.

Description of Physical Appearance

The 1722-N Building is a rectangular, one-story, metal framed structure with a reinforced poured concrete foundation, corrugated metal exterior wall, and gable roof surfaces. It is connected to the northwest side of the 105-N Reactor Building. It measures 44 ft by 24 ft (13 m by 7 m); 1,056 ft² (91 m²). No significant changes have been made to this structure.

The N Reactor UTM coordinates are as follows: Northeast corner - 303974E, 5172485N; southeast corner - 303974E, 5171639N; southwest corner - 303069E, 5171639N; northwest corner - 303069E, 5172485N.
